Career Objective

I am seeking a Junior Web Developer role where I can continue building responsive and user-focused web applications. I enjoy creating interfaces that are easy to use and improving how people interact with digital products. I am interested in frontend and full stack development and want to continue developing practical experience working with modern web technologies.

Technical Skills

Frontend

Proficient: Vue.js, JavaScript, HTML5, CSS3

Programming

Java, Python

Familiar With

React, TypeScript, SQL, REST APIs

Tools & Practices

Git, GitHub, Jest, JUnit, Figma, Agile Development

Concepts

Responsive Design, User Input Validation, Component-Based Development, UI Testing

Project Experience

Event Management Web Application

Tools: Vue.js, JavaScript, HTML5, CSS3, REST APIs

- Developed a responsive web application that allows users to create events and manage RSVPs.
 - Implemented frontend functionality including authentication flows and form validation.
 - Connected frontend interactions with backend services through REST APIs.
 - Built reusable UI components and maintained responsive behaviour across devices.
-

Personal Portfolio Website

Tools: HTML5, CSS3, JavaScript

- Designed and developed a personal portfolio website to showcase projects and technical work.
- Built responsive layouts and maintained a clean navigation structure.
- Managed source control through Git and GitHub.
- Improved understanding of frontend architecture and deployment workflows.

Portfolio: <https://zirui-jia.dev/>

Transport Route Planning Application

Tools: Java

- Developed a transport route planning application that calculates optimal routes.
 - Implemented DFS, BFS, and A* algorithms to support pathfinding.
 - Processed structured transport data and designed routing behaviour.
 - Applied debugging and testing practices throughout development.
-

Java Maze Game Project

Tools: Java, JUnit, Git

- Contributed to a team-based software engineering project to develop a 2D maze game.

- Supported implementation, debugging, and software testing activities.
 - Wrote unit tests using JUnit to improve reliability.
 - Built a simple fuzz testing tool to identify unexpected system behaviour.
-

Work Experience

Coding & Robotics Tutor — Scots College, Wellington

2024 – Present

- Deliver coding and robotics lessons to secondary school students.
 - Teach Python programming and structured problem solving.
 - Support students with debugging and technical exercises.
 - Guide students preparing for robotics competitions including RoboCup.
 - Adapt explanations for students with different technical backgrounds.
-

Mobile Phone & Appliance Repair Technician — Wellington

Dec 2025 – Feb 2026

- Diagnosed and repaired phones, computers, and household devices.
 - Identified hardware and software faults and completed quality checks.
 - Performed operating system setup and data transfers.
 - Communicated technical issues clearly to customers.
-

Front-of-House Team Member — Wellington

2021 – 2025

Sushiya (2023 – 2025)

One Sushi (2022 – 2023)

Dynasty Restaurant (2021 – mid 2022)

- Delivered customer service in busy hospitality environments.
- Managed customer orders, payments, and enquiries.

- Worked collaboratively with team members to maintain smooth service.
 - Developed communication and problem-solving skills through customer interaction.
-

Education

Bachelor of Science — Computer Science

Minor in Artificial Intelligence

Victoria University of Wellington | 2023 – 2025

Relevant study areas:

- Web Development
 - Human Computer Interaction
 - Software Engineering
 - Databases
 - Machine Learning
-

Certifications

- AWS Certified Cloud Practitioner — 2026
 - VUW Git & GitHub Workshop — 2024
-

Referees

Available on request.
