Graduate Software Engineer | Frameworks, Web Systems & Test Automation

SUMMARY

Recent Computer Science graduate with a Minor in Artificial Intelligence, focused on reliable software systems, reusable components, web-based interfaces, service architectures, debugging, and test automation. Practical experience with Java, Python, JavaScript, TypeScript, React, Node.js, Express, REST APIs, SQL, Git, JUnit, and documentation through university and personal projects. Strong foundation in object-oriented programming, data structures, algorithms, Git-based collaboration, and AI agent assisted engineering workflows for planning, debugging, code review, and documentation while carefully validating technical outputs.

TECHNICAL SKILLS

Programming: Java, Python, JavaScript, TypeScript, HTML, CSS

Software Engineering: Object-Oriented Programming, Data Structures, Algorithms, Software Design, Debugging, Code Review, Documentation

Web and Services: React, Node.js, Express, REST APIs, API Endpoint Development, Frontend/Backend Interaction

Testing: JUnit, Test Case Design, Fuzz Testing, Manual Testing, Defect Investigation, Test Automation Concepts

Tools and Practices: Git, GitHub, Agile Development, SDLC, CI/CD Awareness, AI Agent Assisted Development

Additional Exposure: Software Architecture, Modular Systems, Cloud Fundamentals, Performance Optimisation Concepts

EDUCATION

Victoria University of Wellington

2023-2025

Bachelor of Science - Computer Science, Minor in Artificial Intelligence

Relevant study areas: Software Engineering, Algorithms and Data Structures, Databases, Machine Learning, Human Computer Interaction, Network Systems

EXPERIENCE

Coding and Robotics Tutor

2024-Present

Scots College

- Deliver coding and robotics sessions using Python and robotics platforms, supporting students through practical technical exercises.
- Help students debug code, break problems into smaller steps, and understand logic, errors, and expected system behaviour.
- Guide students preparing for robotics competitions including RoboCup, encouraging structured problem solving and teamwork.
- Explain technical concepts clearly and adapt communication style to different levels of experience.

PC and Mobile Phone Repair Technician

Dec 2025-Feb 2026

UR Tech

- Diagnosed and repaired computers, mobile phones, and electronic devices across hardware and software issues.
- Installed and configured operating systems, completed device setup, data transfers, updates, and quality testing.
- Troubleshoot user-reported technical faults and communicated clear, practical solutions to customers.

PROJECTS

Reel Local Cinema SaaS | React, TypeScript, Node.js, Express

- Developed a full-stack cinema booking platform with web-based user interfaces and backend service endpoints.
- Built frontend functionality with React, TypeScript, Vite, and React Router, including protected routes, movie browsing, booking workflows, and user profile pages.
- Developed backend APIs using Node.js, Express, and TypeScript, strengthening understanding of frontend/backend interaction and REST API behaviour.
- Organised routes, reusable components, backend logic, and documentation to improve maintainability and support future extension.
- Currently extending the platform towards PostgreSQL integration, JWT authentication, Docker-based development, and cloud deployment practices.

Java Maze Game and Testing Project | Java, JUnit, Git

- Contributed to a team-based software engineering project to build a 2D maze game with reliable gameplay behaviour.
- Applied object-oriented programming, debugging, Git collaboration, and structured testing throughout development.
- Designed and implemented JUnit test cases to improve reliability and detect regressions.
- Built a simple fuzz testing tool to repeatedly run the application and identify unexpected edge-case failures.

Handwritten Character Recognition Project | Python, Machine Learning

- Built a Python-based prototype to classify handwritten letters and numbers from image datasets.
- Prepared datasets, compared model behaviour, evaluated outputs, and adjusted preprocessing and training decisions.

CERTIFICATIONS

AWS Certified Cloud Practitioner - 2026 | VUW Git and GitHub Workshop - 2024
