Graduate Test Engineer | Data & API Testing

CAREER OBJECTIVE

Recent Computer Science graduate with a Minor in Artificial Intelligence, focused on test engineering, data validation, API testing, and software quality. Practical experience with SQL, Python, Java, JUnit, debugging, data processing, REST API development, and structured test case design. Strong foundation in software engineering, data handling, defect investigation, and AI-assisted testing workflows, with motivation to contribute to data-focused programmes and CI/CD quality practices.

TECHNICAL SKILLS

Testing	Manual testing, functional testing, regression testing, integration testing, test case design, defect investigation
Data Testing	SQL, data validation, data cleaning, dataset checks, source-to-target checking concepts, ETL pipeline testing awareness
Automation	Python, Java, JUnit, scripted checks, fuzz testing, repeatable test execution, debugging
API & Integration	REST APIs, backend endpoints, request/response validation, data flow validation, frontend-backend integration
Tools & Platforms	Git, GitHub, Jupyter, Google Colab, documentation, CI/CD awareness, Azure DevOps awareness, Databricks awareness
AI Assisted Work	AI agent tools for test planning, debugging, documentation, code review, SQL support, and validation assistance

PROJECT EXPERIENCE

Java Maze Game and Testing Project

Java, JUnit, Git

- Contributed to a team software engineering project focused on application behaviour, reliability, and maintainability.
- Designed and implemented JUnit unit tests to detect defects, validate expected behaviour, and support regression checking.
- Built a simple fuzz testing tool to repeatedly execute the application and identify unexpected behaviours and edge-case failures.
- Practised structured defect reproduction, debugging, Git-based collaboration, and clear documentation of technical issues.

Reel Local Cinema SaaS

React, TypeScript, Node.js, Express

- Developed a full-stack cinema booking application with frontend workflows, backend API endpoints, and structured application data.
- Built and tested user-facing flows including movie browsing, booking workflow, login/logout behaviour, protected routes, and user profile pages.
- Created backend services using Node.js, Express, and TypeScript, strengthening understanding of REST APIs and integration points.
- Validated frontend-backend behaviour through structured debugging, response checking, and issue reproduction during development.

Data and Machine Learning Projects

Python, SQL concepts, Jupyter, Google Colab

- Prepared and validated structured datasets for handwritten character recognition and AG News text classification projects.
- Checked data quality, class labels, preprocessing outputs, training/test splits, and model results to identify inconsistent or incorrect outputs.
- Compared results using accuracy and class-level metrics, strengthening practical data validation and error analysis skills.
- Used Python workflows to process data, evaluate outputs, document findings, and investigate issues systematically.

RELEVANT EXPERIENCE

Coding and Robotics Tutor

Scots College | 2024 - Present

- Teach programming and structured problem solving using Python and robotics platforms.
- Support students with debugging, testing, data handling, and step-by-step logical thinking.
- Explain technical problems clearly, adapt communication to different learning levels, and guide students through issue resolution.

PC and Mobile Phone Repair Technician

UR Tech | Dec 2025 - Feb 2026

- Diagnosed hardware and software faults across computers, mobile phones, and electronic devices.
- Investigated system issues, performed operating system setup, completed data transfers, updates, and quality checks.
- Communicated technical issues clearly to customers and built strong practical troubleshooting and defect investigation skills.

EDUCATION

Bachelor of Science - Computer Science, Minor in Artificial Intelligence

Victoria University of Wellington | 2023 - 2025

- Relevant study areas: Software Engineering, Network Systems, Databases, Algorithms and Data Structures, Machine Learning, Human Computer Interaction.

CERTIFICATIONS AND ADDITIONAL INFORMATION

- AWS Certified Cloud Practitioner - 2026; VUW Git and GitHub Workshop - 2024.
- Available for graduate or junior roles in test engineering, data testing, QA, API testing, and software quality.
- Fluent in English and Mandarin; referees available on request.
